

Not only am I opposed to cell phone useage on planes but I also would request either rooms in the airport for cell phone use or quiet rooms for passengers to sit while waiting for their planes. I am not interested in hearing someone's personal or private business. I find most cell phone users to be noisy and inconsiderate of those around them and avoid sitting near them in airports when possible but that is becoming increasingly difficult. It amazes me that people seem to thing they cannot be "disconnected" for an hour or 2. No one is that important!!!
